DETAILED ACTION

Claim Objections

1. Claims 11 and 13-15 are objected to because of the following informalities:
2. Claims 11 and 13-15 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claim 11 is a duplicate of claim 2, and claims 13-15 are duplicates of 4-6, respectively.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1, 3-4 and 11-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Merkwacz.

In regard to claim 1, Merkwacz discloses a sleeve comprising:

A core 26 of the sleeve having an inner surface and an outer surface;

A first layer 28 bonded to the inner surface to the inner surface of the core; and

A second layer 22b bonded to the outer surface of the core wherein the second layer is longer than the core so as to extend beyond the core. However, Merkwacz does not specifically disclose that the second layer is made from a material having a lower coefficient of friction than the first layer. However, it would have been obvious to one having ordinary skill in the art

Art Unit: 3679

at the time the invention was made to make the second layer from a material having a lower coefficient of friction because the selection of a known material based upon its suitability for the intended use is a design consideration within the skill of the art. In re Leshin, 227 F.2d 197, 125 USPQ 416 (CCPA 1960).

In regard to claim 3, the first layer 28 and the second layer 22b are longer than the core, such that the first and second layer may be bonded together.

In regard to claim 4, further comprising a third layer 32 bonded to the second layer proximate a medial portion of the sleeve.

In regard to claim 12, the first layer and the second layer are longer than the core, such that the first layer and the second layer may be bonded together beyond an end of the core.

Response to Arguments

5. Applicant's arguments with respect to claims 1, 3-6 and 11-15 have been considered but are moot in view of the new ground(s) of rejection.

Allowable Subject Matter

6. Claims 9-10 are allowed.

7. Claims 2 and 5-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 3679

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
